Why OceanDrive Infura?

Decentralized Storage

OceanDrive Infura is at the forefront of the decentralized storage revolution. Unlike traditional centralized storage solutions that come with inherent security and privacy risks, OceanDrive leverages the power of blockchain and decentralized networks to provide a secure, private, and reliable storage platform. By decentralizing data across a network of nodes, OceanDrive ensures that your data remains resilient against single points of failure and minimizes the risk of data lost.

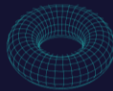

Gateway and Storage Provider

OceanDrive Infura acts as a gateway to a vast network of storage providers. These providers contribute their storage capacity to the OceanDrive network, ensuring that you have ample space to store your data securely. By connecting with OceanDrive Infura, you gain access to this network of storage resources, offering scalability and flexibility to meet your storage needs. Whether you require a small amount of space or a significant storage capacity, OceanDrive Infura can accommodate your requirements.

Accessibility and Availability

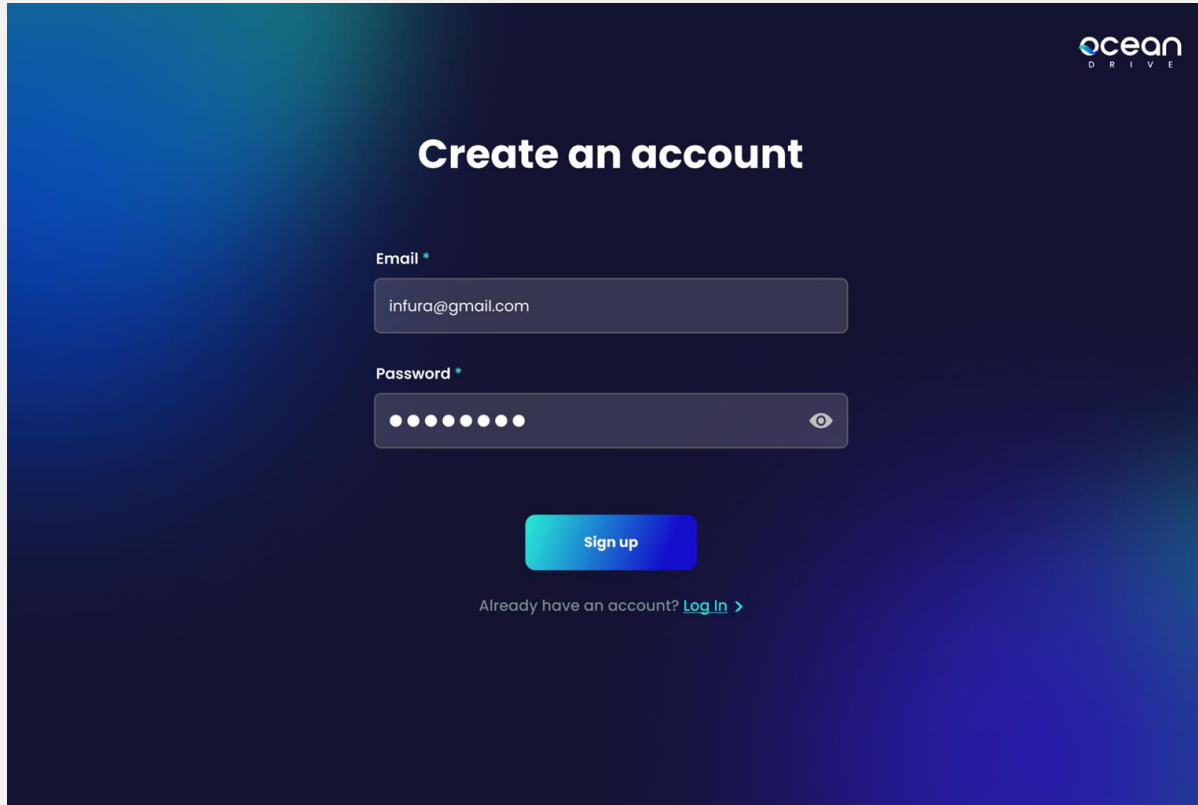

One of the core benefits of OceanDrive Infura is the unparalleled accessibility and availability it offers. Your stored data is accessible from anywhere with an internet connection, making it a truly global storage solution. Whether you're at home, in the office, or on the go, your important files and documents are just a few clicks away. Plus, OceanDrive's decentralized nature means that your data is always available, even if some nodes in the network go offline. This ensures that you can retrieve your data whenever you need it, without worrying about downtime or data loss.

Infura Dashboard

The Infura Dashboard is your command center for managing your OceanDrive experience. It provides an easy-to-navigate interface where you can control your storage, explore shared assets, and monitor your usage. From the dashboard, you can initiate storage pool creation, track rewards, and manage your data encryption settings. It's designed to be user-friendly and informative, giving you complete visibility and control over your OceanDrive Infura account.

1

Step 1.

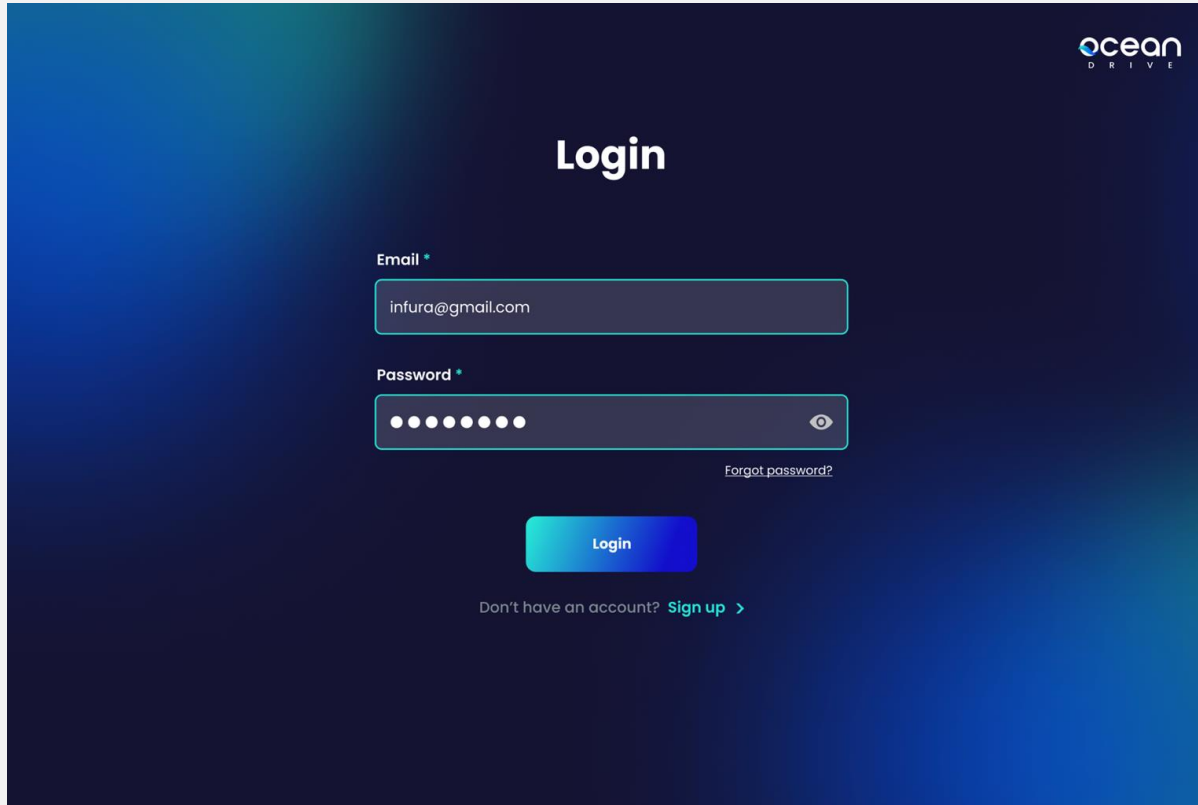

1. Enter your email (required)
2. Enter your password (required)
3. Click Sign up button

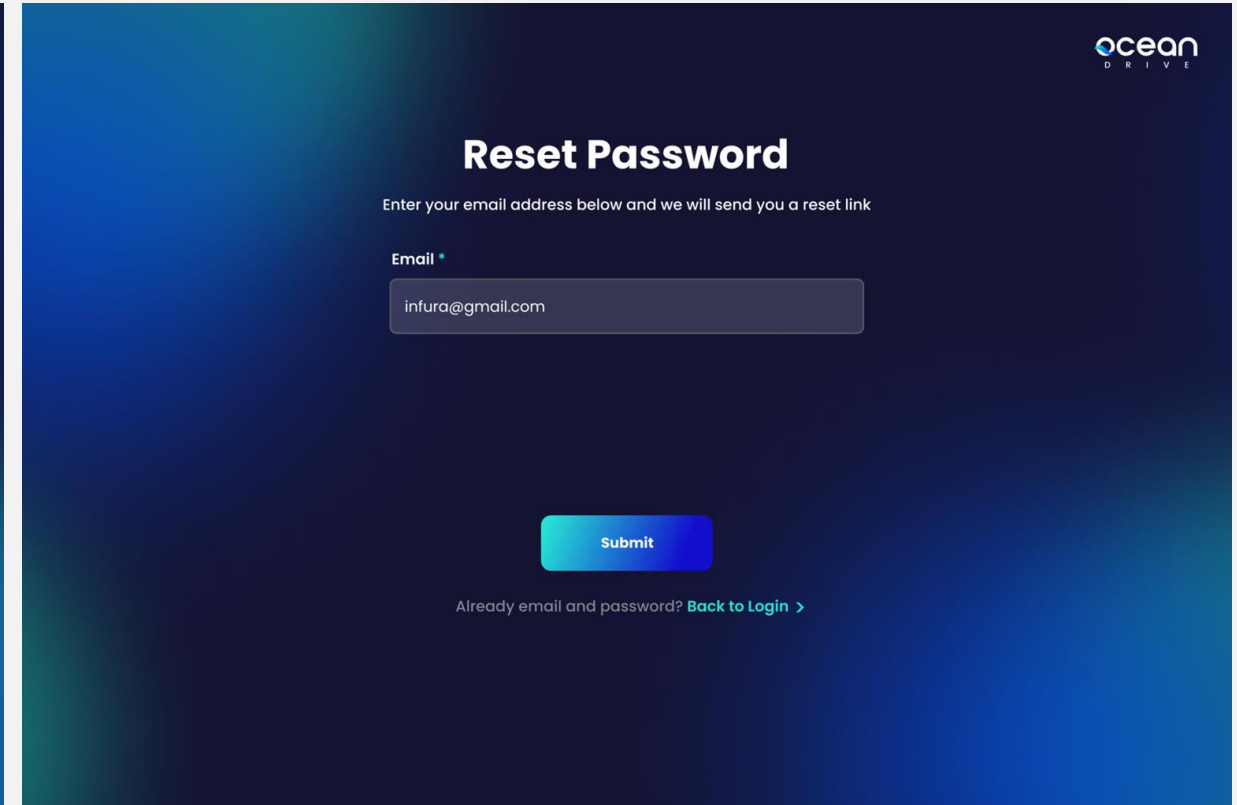

2

Step 2.

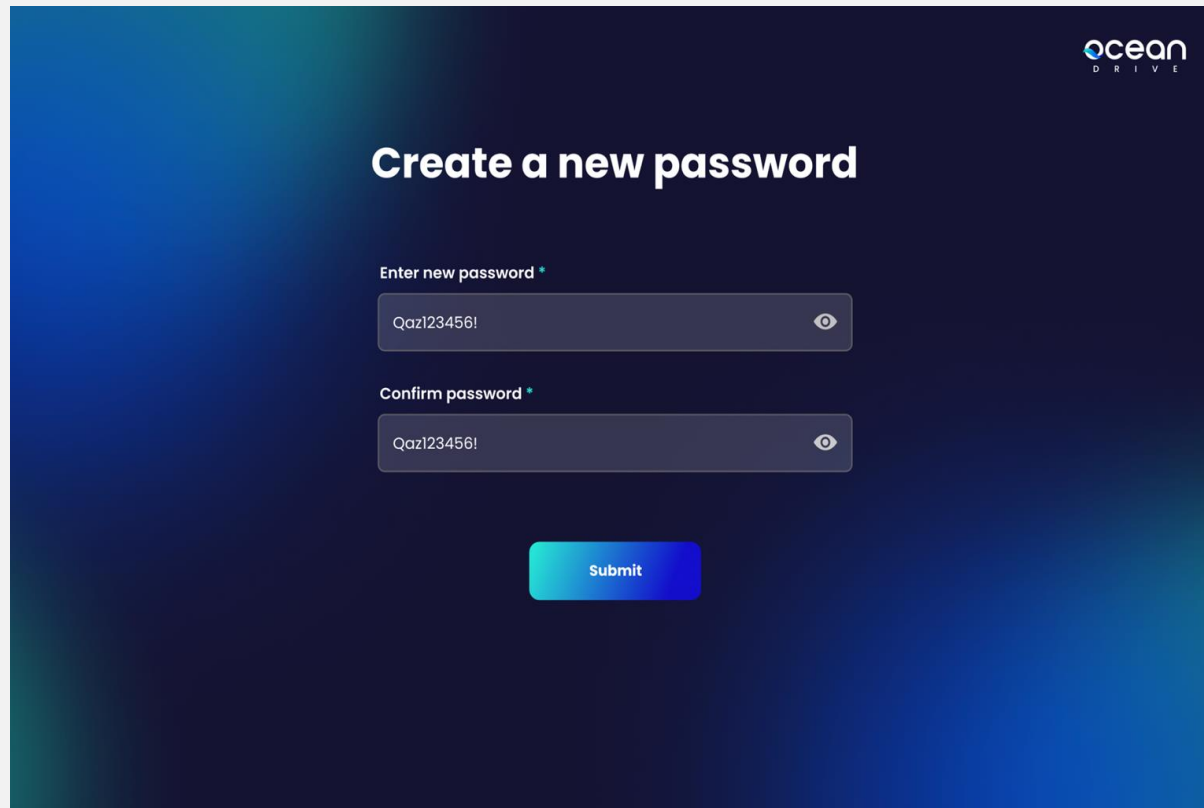

1. Check your email for **confirmation code** and enter it into the input field.
2. If you did not receive a code, click '**resend**' and check your email for a **new code**.
3. Click the confirm button. If you have registered successfully you will be directed to login page.

- 1 **Step 1.**
1. Enter your email (required)
 2. Enter your password (required)
 3. Click login button
 - if successful, you will be directed to dashboard page
 4. If you forgot your password, click 'forgot password?'.

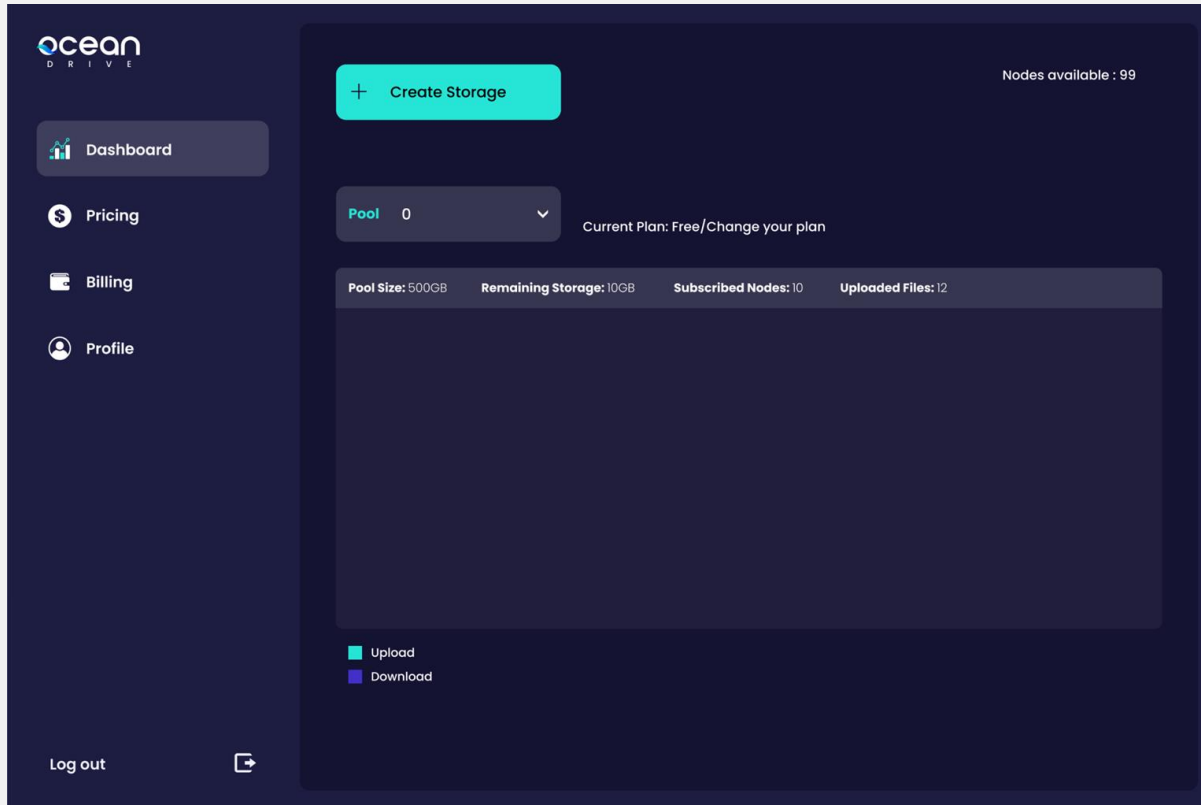

- 2 **Step 2. Reset Password**
1. Enter your email (Email – during account registration one).
 2. Click submit button and check your email. You will have received a link.
 3. Click the link in your email and you will be directed to **create a new password.**

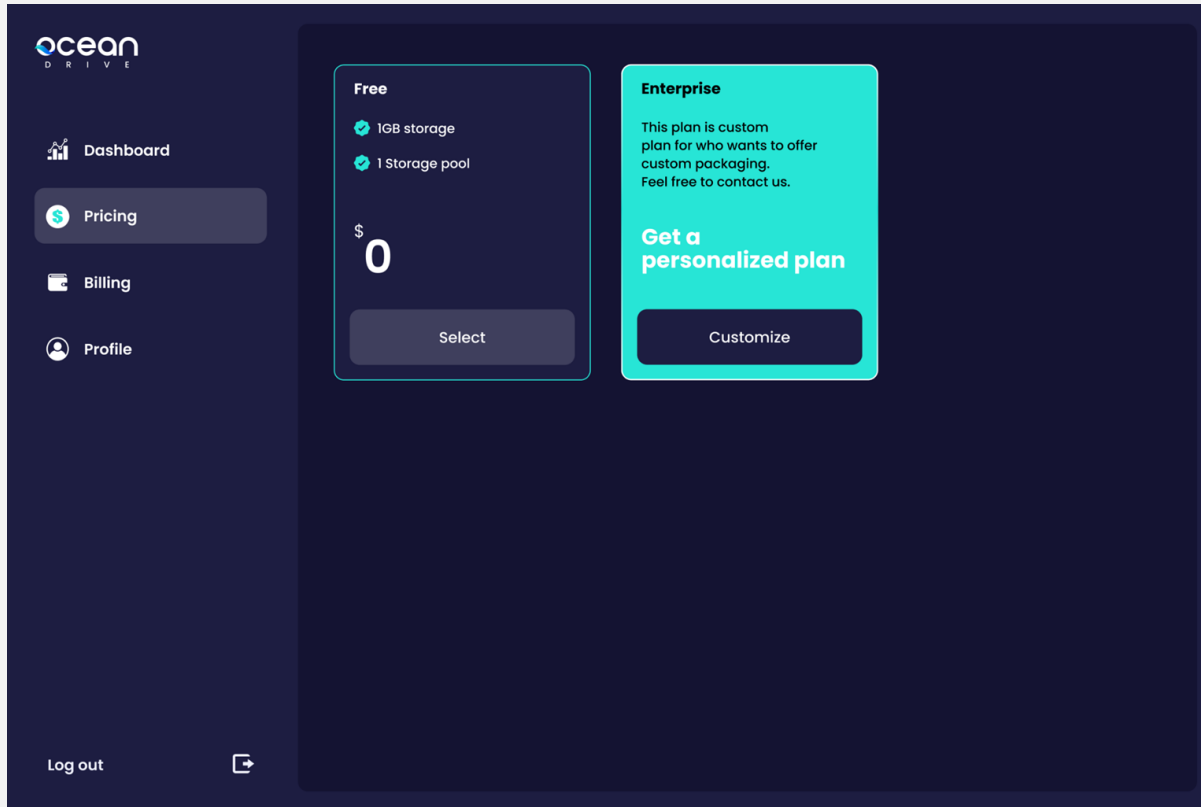

The screenshot shows a dark blue gradient background with the 'ocean DRIVE' logo in the top right corner. The main heading is 'Create a new password' in white. Below it, there are two input fields. The first is labeled 'Enter new password *' and contains the text 'Qaz!23456!'. The second is labeled 'Confirm password *' and also contains 'Qaz!23456!'. Both fields have a small eye icon to the right, indicating a toggle for password visibility. At the bottom center, there is a blue 'Submit' button.

- 1 Step 1. Create a new password**
1. Enter your new password (required)
 2. Confirm your new password (required)
 3. Click submit button – if successful you will be directed to **login page**.

04 Dashboard

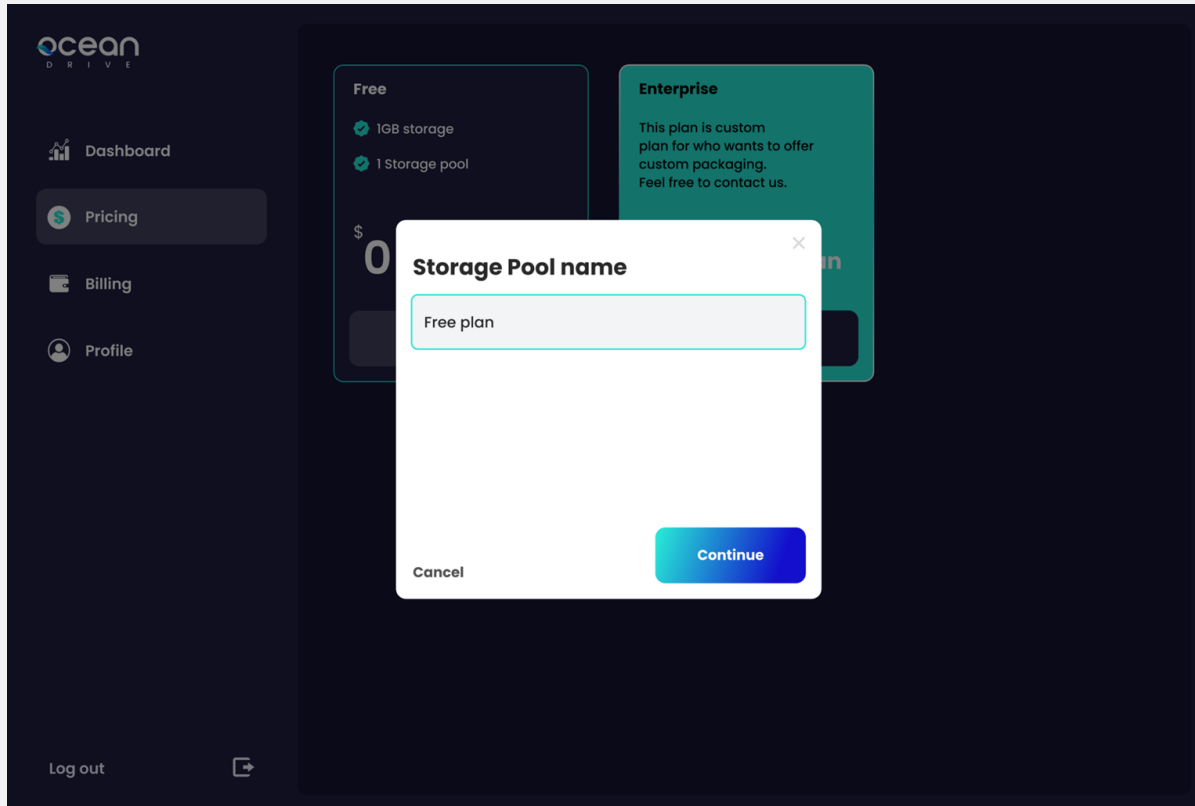

- 1 **Create Storage button**
– when clicked you will be directed to pricing page.
- 2 **Pool selectable button**
– when clicked you can see the selected or all pool statistics.
- 3 **Pool statistics**
– Pool size, remaining storage, subscribed nodes, uploaded files
- 4 **Pool bar chart**
– 2 bars: green
– uploaded files, dark pink
– downloaded files in selected pool
- 5 **Nodes available number**

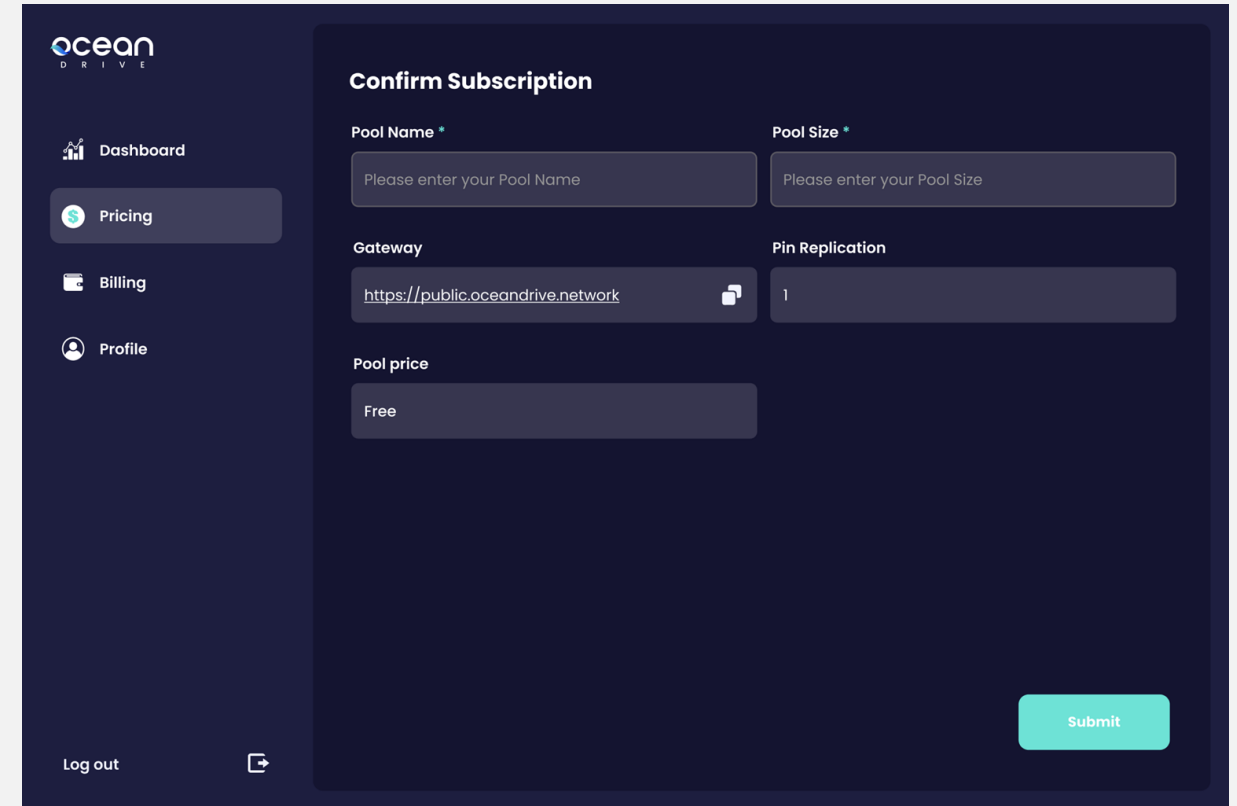

- 1 **Two cards for usage – Free and Enterprise**
 1. Free – 100GB storage, 1 pin replication
 2. Enterprise – Personalized plan for those who want to create custom packaging

- 2
 1. When Free plan is selected, **gateway modal** opens to continue to confirm subscription.
 2. When Enterprise plan is selected, it will **direct to the pool form page**. (Only if the wallet is connected. Otherwise it will go to connect wallet page.)

05 Pricing – Free Plan Selection

- 1 Step 1.**
1. Enter **storage pool name** to continue.
 2. Click continue button
 - if successful you will be directed to **confirm subscription**. If unsuccessful, enter a new pool name.

- 2 Step 2.**
1. In confirm subscription, click submit button
 - if successful you will be directed to profile page.
